

Our Environmental Focus

Through all of Larson-Juhl's efforts, the focus on our environment is a top priority.

With manufacturing locations throughout the world, it is important that each facility do their part to keep our world clean and beautiful for future generations.

In 1991, Larson-Juhl partnered with American Forests to begin the Global ReLeaf ecosystem restoration project. Since then, Larson-Juhl has planted over a quarter of a million trees throughout the world!
